Profile

- Frontend Developer with 4 years' experience in diverse projects for small- and medium-sized businesses in banking, service and enterprise industries; holds a Bachelor of Information Security
- Demonstrates strong problem-solving skills in tasks such as implementing new features, enhancing functionality and bug fixing
- Experienced in code reviews, unit testing, and comprehensive project documentation to ensure code quality and project transparency
- Collaborates closely with cross-functional teams and business stakeholders to enhance UI/UX
- Demonstrates adaptability in small and large teams, applying various project management methodologies like Waterfall and Agile
- Strong skills in JavaScript and TypeScript for building complex web applications, utilizing frameworks like React and libraries such as Redux, Effector, Styled Components, MUI5, and others. Expertise in creating responsive and cross-browser layouts using HTML and CSS/CSS preprocessors

Skill Summary

Technical

- Integrated RESTful APIs, managed asynchronous operations with tools like Axios, to retrieve real-time data and create a user-friendly interface
- Used Git for version control, managing branches, merging code, and resolving conflicts to collaborate within a development team and ensure efficient code management.
- Designed and implemented reusable and modular React components to create a dedicated UI library with Storybook documentation, improving consistency and efficiency across multiple projects.
- Tested and debugged code utilizing DevTools and tools such as BrowserStack to resolve compatibility issues and make applications adapt and perform effectively on various devices and screen sizes.
- Implemented and wrote more than 200 Jest unit tests for project components and a separate utility library, elevating code quality and enhancing confidence in the codebase.
- Configured and revised Webpack and Rollup builds to optimize the project, reducing local deployment and staging times.

- Prepared project documentation, crafted unit test implementation instructions, and developed a system projects guide for the development team to store and share knowledge about the code.

Teamwork

- Collaborated with team members to enhance overall understanding, streamline communication, and collectively overcome challenges in the development process.
- Analyzed and oversaw the team's development efforts, established good practices and habits to work towards successful code delivery while maintaining high standards of code quality.
- Guided and mentored new developers by immersing them in the project, conducting code reviews, leading to a quick and comfortable onboarding experience, and facilitating integration into the team.

Workplace Activities

- Participated in over 10 assessments of new projects for potential and current clients to provide insights into the time and resources required for implementation.
- Provided mentorship and onboarding to a group of three potential company employees, two of whom successfully completed the trial period and were hired by the company.
- Prepared and delivered a presentation to colleagues to share experiences, enhance overall knowledge, explore new approaches and tools, and foster team development.

Work Experience

Frontend Developer   **Aug 2020 - Nov 2023**
Simbirsoft   Kazan, Russia

Frontend Developer Trainee   **Oct 2019 - Feb 2020**
Imperium Web   Kazan, Russia

Education

Bachelor's Degree in Information Security   **2020**
Kazan State University   Kazan, Russia
